Aeoon Compact Series

The Aeoon Kyo Compact Series is our newest addition to our range of digital direct to garment textile printers. We made the effort to listen to the needs of our customers and designed a completely new machine that lives up to their requirements. The Aeoon Compact Series is smaller and elegant, yet equally durable than our well-known Aeoon Kyo Series. Therefore, it is perfect for businesses with limited space availability.

But even though we reduced the size, we did not want to lower our aspirations in terms of speed and output. The Aeoon Kyo Compact Series can reach printing speeds of up to 950 T-Shirts per hour (A4 print size, depending on image and resolution).

Features:

- Slim, elegant design
- Up to 950 T-Shirts per hour
- Maximum printing size: 40x50cm
- Temperature controlled ink compartment (optional)
- Nano-coated machine body for easy cleaning (optional)
- Size: 2,8m x 2,2m x 1,7m // Weight: 1.500kg

The machine is available with four or eight print heads that can be configured according to your needs.

The version with four printheads can print in CMYK on light and white garments. The version with eight print heads can either print with twice the CMYK heads on light and white garments or in CMYK and white on every color, including dark garments.
